Report on Thalassemia Awareness Programme on 12.07.2024

A inherited blood condition known as Thalassemia affects millions of people worldwide. Thalassemia is a genetic blood illness that is inherited, meaning it is handed down from parents to their offspring. It is brought on by insufficient production of haemoglobin, a protein that is essential to the formation of red blood cells.

In view of the above, NSS Unit of Nikhil Banga Sikshan Mahavidyalaya in association with the Thalassemic Guardian Society organized an awareness programme on 12.07.2024 at Seminar Hall to aware the students of both B.Ed & B.P.Ed department. The 1st day motivational programme was hosted by **Mr. Sanjay Bhunia**, NSS Program Officer. **Mr. Prabir Sen**, as Resource Person & President, Thalassemic Guardian Society presented his deliberation with documents and nicely explained the feature of the Thalassemic patients. **Dr. Bhim Chandra Mondal**, Principal, in his inaugural speech cited the importance of Thalassemia detection and aware everyone about the importance of the inherited blood disorder and welcome all the students for actively attend the programme.

At the end a feedback has been organized from the students and their quarries were resolved by the resource person. Principal conclude the programme informing everyone about the test and request all to attend the detection programme and ensure their blood report about on Thalassemia.
