Report on Investor Awareness Programme on 13.11.2024

Investor awareness is a word used in investor relations by publicly traded firms and comparable organisations to characterise the level of knowledge that investors and the investment market as a whole possess about their business. NSE places a high priority on educating and raising awareness among small retail investors so they may make well-informed investment decisions. NSE works to guarantee that the investor understands financial concepts, acquires and applies information needed for investing, assesses different investment options to meet his unique objectives, determines his rights and obligations in a given investment, transacts through registered intermediaries, takes the required precautions, and seeks assistance in the event of any grievance, among other things. Investor awareness seminars are held all throughout the nation to educate people about the financial and securities markets and to equip them with the knowledge and skills necessary to be wise investors. As a matter of Corporate Social Responsibility (CSR) and in compliance with SEBI mandate, “BSE - Investors Protection Fund” conducts Investor Awareness Programmes nationwide to create awareness among Investor Community in order to impart real understanding about capital market and the role of BSE, Basics Of Safe Investments and Rules of Trading & Investing. In view of the above, IQAC, Nikhil Banga Sikshan Mahavidyalaya in association with Bombay Stock Exchange (BSE) organized an Investor awareness programme on 13.11.2024 at Seminar Hall to aware the faculty members, students of both B.Ed & B.P.Ed department and staff members. **Mr Abhijit Saha** from BSE discussed various aspects of investment feature in front of the audience followed by feedback from the participants.

Felicitation to Mr saha
