Report on Pre-Internship programme with Head Master/Mistress

Date – 25.08.2026

A teaching internship gives prospective educators a chance to participate in educational activities. Working in a classroom with elementary or secondary students can help them develop experience in a range of teaching facets. It is a great way to train potential teachers to teach and cultivate basic knowledge, skills, attitudes, and appreciation in a practical classroom setting. According to the BSAEU curriculum, the B.Ed. internship program will be offered in two parts, SEM II and SEM III. In order to familiarise themselves with the educational system, the teacher candidate offers the classroom environment in SEM II. The head mistress and head master of the internship school in Bishnupur, Bankura, as well as the student teachers in the B.Ed. department, were the target audience for this induction session. Principal Dr. Bhim Chandra Mondal explains why the program is necessary. The activities that SEM II interns were required to observe were described in detail by Dr. Kalpataru Mondal. Furthermore, it has been decided to extend this process by one month, from September 01, 2026, to September 30, 2026. The head master and head mistress both talked about their individual roles in the many committees and school activities. The students started asking different questions to learn more about the internship after the discussions between the head of the internship school and the college administration. Dr. Kalpataru Mondal, the Assistant Professor, summarized the program's activities and restated the key points at the conclusion. He also mentioned the several proformas that had to be completed before applying for an internship. 48 student-teachers were assigned to 9 internship schools using a randomised procedure in front of the student teachers. Dr. Santanu Golui has cast the vote of appreciation, ending the session.
